Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/745,983

Applicant(s)

MAO, JIM

Examiner

Steven P Sax

Art Unit

2174

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This application has been examined. The amendment filed 9/30/04 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6, 11-13, 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwamura (5883621).

4. Regarding claim 1, Iwamura shows selecting by a user a connection source and destination from a graphical user interface that displays a topology of a network (Figures 6-7, 12, column 2 lines 1-8, column 3 lines 7-20), executing a routing algorithm to determine a path through the network from a plurality of possible paths, each the path and possible paths having as endpoints the connection source and destination (Figure 12, column 8 lines 17-35 and 56-65), provisioning the connection within the network that corresponds to the path (Figures 6-7, column 6-18).

Art Unit: 2174

5. Regarding claim 2, a distributed algorithm is executed at a node (column 5 lines 5-25, column 6 lines 23-33).

6. Regarding claim 3, the topology information is sent from a first node to a second node (column 5 lines 5-25).

7. Regarding claim 6, the routing algorithm is executed at a network control management system (column 4 lines 15-30).

8. Claims 11-13 and 16 show the same features as claims 1-3 and 6 respectively are rejected for the same reasons respectively.

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 4-5, 7-10, 14-15, and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwamura (5883621) and Rakoshitz et al (6578077).

11. Regarding claim 4, in addition to the aforementioned, Iwamura does not go into the details of the bandwidth resource information being sent from one node to another,

Art Unit: 2174

but does mention routing information from one node to another for efficient monitoring of a network. Furthermore, Rakoshitz et al show sending bandwidth information for efficient monitoring of a network (column 4 lines 57-68, Figure 3, column 10 lines 15-35, Figure 9A, column 16 lines 44-60). It would have been obvious to a person with ordinary skill in the art to include bandwidth information in the information being sent from one node to another in Iwamura, because it would allow efficient monitoring of a network.

12. Regarding claim 5, in addition to the aforementioned, Iwamura does not go into the details of the Quality of Service information being sent from one node to another, but does mention routing information from one node to another for efficient monitoring of a network. Furthermore, Rakoshitz et al show sending Quality of Service information for efficient monitoring of a network (column 4 lines 40-55, Figures 9A-15, column 16 lines 44-59, column 17 lines 8-33). It would have been obvious to a person with ordinary skill in the art to include Quality of Service information in the information being sent from one node to another in Iwamura, because it would allow efficient monitoring of a network.

13. Regarding claims 7-8, a graphical user interface is used to select the bandwidth and Quality of Service parameters (Rakoshitz et al see Figures 9-11 for example).

Art Unit: 2174

14. Regarding claims 9-10, the Quality of Service parameters include end to end transit delay (Rakoshitz et al column 5 lines 3-16) and jitter (Rakoshitz et al column 5 lines 17-25).

15. Claims 14-15 and 17-20 show the same features as claims 4-5 and 7-10 respectively and are rejected for the same reasons as those claims respectively.

16. Applicant's arguments filed have been fully considered but they are not persuasive. The paths that are determined are the possible paths, with the same connection source and destination endpoints. Applicant's representative is invited to contact Examiner at 571-272-4072 to discuss claim interpretation.

17. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P Sax whose telephone number is (571) 272-4072. The examiner can normally be reached on Monday thru Friday, 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
